

## Already Successful

You are already a success. Yes, you.

Did you realize you were a success? Do you believe it? Why? Why not?

Sure, some of you know it, realize it, and appreciate it.

Unfortunately, many of you may not feel you are a success. You have all the reasons why you are not a success:

- Don't earn enough
- Position is not on top
- Don't own a company
- Don't know enough
- Did not make that big sale
- Was not selected for the desired position
- Don't know how to do X
- Don't own that big boat, vacation house, car, or whatever

So, let's realize we are a success. Everything and everyone is always in motion. The world and all of us in the world are made up of energy and energy are always in motion. Everything is not solid, but energy in motion.

If we do not change, we are a success in keeping our energy, our energy that is always moving, in the same place. To not change is to be a success in keeping the energy in the same place in spite of the fact that energy is moving.

Money and things are also moving. They are going to those who are moving in their direction, allowing their energy to do what has to be done to connect to the energy of money and things. It is all about movement and movement to or from.

If you think lack and failure, you are moving in that direction, and you are a success in getting what you believe. Your actions, your movement of your energy, are a success based on your thoughts and beliefs. You moved where you felt you were going and moved to where you felt you belonged and deserved. Yes, it is that simple..

Are you a success at failing? How many times have you failed? What did you have to do or not do to fail? What actions have you repeated to be sure you failed? How many times have you knowingly not made the effort required to reach your goal? All of these are success, success in being sure you failed. See, you did do something, you took some action, or you took too little action or, perhaps, none at all.

You are a success. You now realize you are always in motion and that motion bring to you what you believe. Now that you know you are a success you might want to change your definition of success. You might want to change your focus of success.

Success might no longer be being stuck or being without those things you felt were out of your reach. Now you know you can have them. Now you know that you are in motion just like everyone else. Now you know that you can move in the direction you desire.

It is as easy as changing your actions to the direction you want to go. Knowing you can is the first key, and the second key is taking the action, moving your energy as needed to get to the result you desire.

It takes focus, desire, and action. The action needs to continue until you reach the current goal. Know that you are a success and success is also moving towards and taking the action needed to get to the next goal.

Knowing you are already a success is empowering. Use that power of your success to make it the success you desire. You deserve and can have the success you desire if only you believe it and take the action towards that success.

Success is yours. You only need to choose your success. Yes, it is that simple. Choose it and take the action needed for it.
